

Dr. Byron Hyde

Understanding Myalgic Encephalomyelitis

The New Polio & The Chronic Fatigue Syndromes

The major injuries of both brains correspond exactly. Both demonstrate Brodmann 4 motor cortex injury & Brodmann 38 temporal lobe injury. The only differences are the M.E. brain demonstrates greater functional injury than the paralytic polio brain and the polio brain has a brain stem injury that resulted in his death.

Severe M.E. Injured Brain Scan

Poliomyelitis Brain Autopsy

Both with same cortical area injuries

What you need to know about:

Myalgic Encephalomyelitis (M.E.), the principle Chronic Fatigue Syndromes (CFS), and both the old and New Paralytic Polio threatening the children and adults in North America and Europe today — often referred to as: Acute Flacid Paralysis (AFP), or Acute Flacid Myelitis
